Thompson Town Notes

Mr. and Mrs. Ernest Kalmanovitch and family, Debbra 8, Patricia 6, Michael 5, David 3, Phillip 1, of Copper Cliff, Ont. have taken up residence in Thompson. Mr. Kamanovitch is employed as Officer Engineer for Inco.

* * *

Mr. Norton Anderson, Assistant editor of Special Assignments for The Financial Post was in Thompson recently. The purpose of his visit was to gather material for an article on the community development in the north. Mr. Anderson's article "Stressing Canada's need to Develop the North" will be published in early issue of The Financial Post, and should prove of vital interest to residents of Thompson.

* * *

Mrs. Al Fraser of Winnipeg is visiting with her husband Al Fraser from Bird Construction for two weeks.

* * *

Mrs. Stewart Graham who spent six weeks visiting friends and relatives in Sudbury and vicinity while the children spent their holidays in Kenora, Ontario, has returned to Thompson.

* * *

Mrs. Leo LeBlanc and son David of Winnipeg spent a week with Mr. LeBlanc, who is a member of the Foundation staff.

Diesel Output To Be Suspended

LONDON, Ont. (CP) —General Motors Diesel announced Friday it will suspend production at the end of September.

The move will mean release of about 300 employees, some of whom will be absorbed by other General Motors divisions.

E. V. Rippingille, Jr. president and general manager of GMD, said a fall-off in railroad business has reduced rail requirements for motive power, and this has cut GMD's forecast production of locomotives for 1962.

SERVING THOMPSON AND NORTHERN MANITOBA
VOLUME 1, NUMBER 8 WEDNESDAY, SEPTEMBER 7, 1960 THOMPSON, MANITOBA

A Special Day In A Young Lady's Life

This little northern miss agreed to pose on school opening day. She is apprehensive and anxious yet happy because the day that she has looked forward to for, oh, so long has arrived. We can't tell you her name, but she is the daughter of a Manitoba Telephone System man who has installed a great many northern phones.

First Program Of Water Sports A Wonderful Day

Sunday, September 4 saw another "first" for Thompson in an exciting regatta delighting the 500 or more spectators with the thrills and spills of water skiing feats and boat races. Starting at the Burntwood River bridge, a spectacular parade of outboard motor boats of varying types ranging from 10 to 40 horsepower presented a magnificent display of navigating prowess as they speeded harmoniously across the Burntwood River. In the lead boat were Nyebor and his band who delighted the audience with the strains of such old melodies as "Pack up your troubles", and other equally pleasing popular band pieces.

The first event was a canoe race, with two canoes participating and two persons in each canoe. Winners of the event were: first Charlie Sheppard and Paul Reimer; second Ed Yelman and Jim Porcher.

The second event was a novelty canoe race with two canoes and with two persons in each canoe, one paddling and the other carrying an egg in a tablespoon. A magnificent feat of equilibrium was maintained by one of the entries until fate in the person of the "clown of the day" (we suspect that his name was Jerry Harvey) took a hand and disqualified the winning team by upsetting the canoe prior to their arrival at the dock.

The outboard motor events were: Thompson Supply Event, 7 1/2 h.p. and under with a driver of school age. Winners: first Bonville, second Polaski, third Helaski.

Cochrane Dunlop Event, 15 h.p. and under, winners; first Bonville, second Dr. Johnston. Winning trophy was presented by Mrs. R. G. Freed, wife of R. G. Freed, Manager of Cochrane Dunlop Hardware at Thompson.

Hudson Bay Event, 25 h.p. and under, winners were: first Helaski, second Bonville, third McIvor. Trophy for the winners was presented by G. Cowie, manager of the Hudson Bay Company at Thompson.

Aroline Boat Company Event, 40 h.p. and under, winners: first heat: first John Sawchuk, second Alf Beckman, third Garth Cowie.

Winners second heat: first John Sawchuk, second G. Cowie, third Alf Beckman.

Koutecky Outboard Event, Open race, one of eight laps: Winners: first John Sawchuk, second G. Cowie, third L. Holaski. The winning trophy was presented to John Sawchuk by Milton Koutecky of Koutecky Outboard Sales and Service.

The Keeper's Trophy was awarded by Don Gibbons of Aroline Boat Company.

The last event was a most thrilling hydro plane demonstration, of aqua skill by Bill Stait, with recorded speeds of 60 miles per hour.

Between events entertainment was provided in water skiing displays by Bill Armstrong.

A special feat demonstration skill and balance was performed by Bill with partner Siggi Muerher. A very unusual display of "Disc" skiing was demonstrated by that hilarious character of the day, the affable clown, who kept the crowd amused by his many spontaneous feats and tricks throughout the entire program.

The Thompson Athletic Association has asked that special mention be made of the following who actively participated in making the water sports day a success; Crawley McCracken, under the management of Bert Akerley, who catered at the hot dog stand, all proceeds being directed to the Thompson Athletic Association; Dr. Dejonkeere, town engineer, who acted in a supervisory capacity; Armand Picard, Manager of Midwest Diamond Drilling; John Sawchuk, Manager of Beaver Lumber Company; Roy Buzza, Brian Webster and Hap Otto; MC's for the day were Milton Koutecky and Don Gibbon.

Neil Adams, president of the Thompson Athletic Association wishes to convey appreciation to all participants in the various events, also to the business people who donated prizes toward the various events, and to all the citizens of Thompson who were present. Names of donors to the Thompson Athletic Association for the water sports day are as follows: Hudson Bay Plumbing, Thompson Cartage, Koutecky Sales and Service, Beaver Lumber Company, Bill Eastcott, Elray Plumbing Company, Breen Boats of Winnipeg, Patrick Harrison and Co., Imperial Oil Ltd., Thiessen Motors Ltd., Midwest Diamond Drilling, North Star Oil Ltd., Modern Dry Cleaners of Dauphin and Mrs. Mary Monita of Modern Dry Cleaners of Thompson, Manitoba, Strand Theatre, Hap Otto, Malcolm Construction Ltd., H. C. Paul Ltd. of Winnipeg, Park Hannersen of Winnipeg, Brothem Painting Ltd., Kelsey Agencies Ltd., Don Gibbons, Aroline Boat Company, Hudson's Bay Company, Cochrane Dunlop Hardware, Thompson Supply Ltd.

Alf Beckman received facial injuries when his boat sideswiped with entry operated by John Sawchuk in the second heat and second lap of the Hudson Bay event. Though bleeding profusely from a cut which took 20 stitches to close, courageous Alf continued in the race and came out third.

SNOW LAKE—NORTHERN MINING COMMUNITY OF THE WEEK

Residents of the mining community of Thompson are happy that another Northern Manitoba mining community, Snow Lake, is sharing in the saga of progress.

The mineral wealth of Northern Manitoba is most impressive in this instance, because Snow Lake was practically at death's door three short years ago when the gold mine there was declared "mined out".

Snow Lake now has a population of 1,000, and while its development program is small in comparison to the huge Thompson program, yet the building of the 52-mile C.N.R. Chisel Lake - Optic Lake extension is a major community accomplishment.

Rich deposits of zinc---and lesser veins of copper gold and silver---have been discovered under a provincial program of research and geophysical surveying.

Instead of a depleted gold mine, prospectors have found four rich mines---all under lakes---in the Snow Lake area, particularly at Chisel Lake. The Hudson Bay Mining and Smelting Company has spent $10 million on a new mine plant, development and exploration.

The rail link and its mineral significance had particular meaning for the pioneer mining town of Flin Flon. This town of 14,000 inhabitants has been assured of at least 10 year's life for each mine going into operation, said HBMS officials.

"In 1928, Flin Flon had 18 million tons of ore in reserve. Today we have as much metal in our reserves as when we atarted 32 years ago."

Recognizing the potential in the Snow Lake area, the Canadian National Railways set to work building the new rail link which would allow ore to be shipped to HBMS smelter at Flin Flon.

Built in less than two years, this latest link with Canada's northern resources is the CNR's third pioneer development line completed in northern Manitoba in the last seven years.

With the era of trans-continental railroad building past, this phase of building, say officials, "is unlocking a treasure chest of striking proportions."

Because of the present development---which provincial and industrial experts say will continue---Snow Lake is becoming one of Manitoba's "suburbs in the wilderness." At least 45 new houses---in the $13,000 range---are being built for resale to employees. Four rooms are being added to the five-room school. The town is fully modern with an eight-bed hospital.

A large gathering of Snow Lake area residents were on hand Friday to watch J. L. Charles drive home the symbolic spike. He is CNR consulting engineer and directed construction of the line.

When CNR diesel engine No. 1389 purred into Chisel Lake Friday, it was greeted by hundreds of enthusiastic miners and families as the first train over the branch line.

When it left, it was pulling the first 50-ton ore car to the Flin Flon smelter. Starting shipments will average 1,000 tons a day. Trains travelling over Manitoba's latest rail line will carry ore, passengers, freight, express and mail.

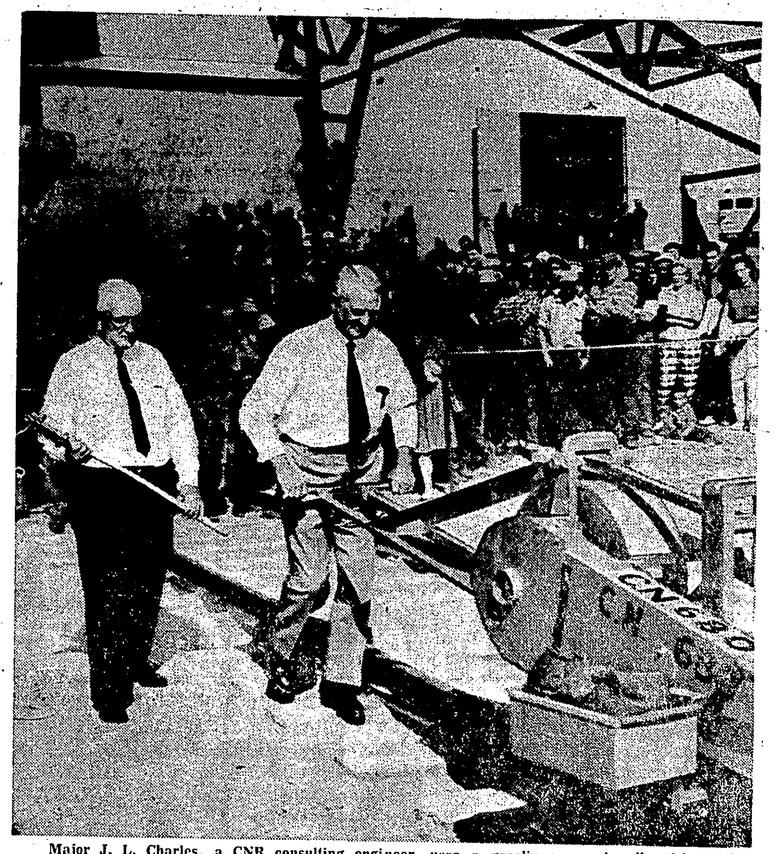
A Big Day For Snow Lake



Major J. L. Charles, a CNR consulting engineer, uses a gasoline-powered spike driver, the modern version of the old sectionman's hammer, to drive home a near-pure zinc spike, the final spike on the Chisel Lake line, which connects by rail the centres of Optic and Chisel Lakes. Looking on is. O. E. Berringer, general manager of the CNR Western Region.

NICKEL

(From a paper presented to the Royal Canadian Institute in Toronto on November 14, 1959, by K.H. J. Clarke). (Continued from Last Edition)

In 1922, with Monel nickel-copper alloy an important factor, Mr. Stanley and Dr. John F. Thompson, today the Chairman of the Board of Directors in INCO, instituted a broad program of development and research. The research staff was expanded; people familiar with marketing problems were hired; new research laboratories were built, and a rolling mill was put into operation; an extensive advertising campaign was begun.

It was a program that required vision, faith and courage--and all three qualities were needed, because, financially, the Company was hard pressed.

Nevert eless, within six years, or by 1928, the annual demand for nickel exceeded the requirements of 1916, which was the peak year of World War I production. Beginning to come from the research laboratories were indications of the thousands of everyday uses to which nickel is now put. Sudbury's prosperity was now tied to the rising standard of living and the growing demand for consumer durable goods.

Nickel is a very unusual metal--toughness, corrosion resistance, strength and resistance to oxidation at elevated temperatures are the chief reasons for its widespread use. It is highly compatible with other metals and helps to impart these qualities to them. It is useful to the steel industry, the copper industry, the aluminum industry and the markets which in turn they serve. In addition, it has markets of its own, such as electroplating, coinage and chemical and food processing equipment.

And so, step by step, due to nickel's properties and with the help of much industrial research, the rugged durability of cars, trucks, and buses was greatly improved by the use of nickel alloy steels; nickel alloy steel parts made heavy construction equipment more durable and dependable; safer, stronger, lighter-weight trains were made of nickel alloys. Nickel and its alloys came into general service for equipment used in plants handling salt, chemicals, pharmaceuticals; in dyeing and dry-cleaning plants; and for equipment used to handle, cook and process fruits, vegetables, soup, meat, fish and fowl. The radio industry was finding a use for nickel alloys in tubes and other parts.

(continued next edition)

Nickel Silver Clarinet Keys

Because of its strength, durability and corrosion resistance, nickel silver, an alloy of nickel, copper and zinc, is used for the keys of better grade clarinets and other wind musical instruments.

Thompson Wedding

BAYER-GOESSLINGHOFF

Of interest to many in Thompson was the wedding on Saturday August 27, of Miss Barbara Goesslinghoff to Rolf Ernest Bayer. The ceremony was performed at the home of Mr. and Mrs. E. W. Miller of Thompson by Rev. Thomas Correll of the Thompson Bible Mission.

Signing the register as witnesses were Mrs. Correll and Nick Schwannhausser.

The bride was charmingly attired in a blue lace gown with bone colored accessories.

The reception followed at the home of Mr. and Mrs. Miller, with Mrs. Schwannhausser as co-hostess. Guests included Mr. and Mrs. Lyons, Mr. and Mrs. Arnie Sorenson, Mr. and Mrs. G. Cowie, Mr. Bennywith and Mr. Cook.

Mr. and Mrs. Bayer, who are planning a visit later to Germany are making their home in Thompson. Mr. Bayer is employed with the Foundation Company.

The THOMPSON Citizen

SERVING THOMPSON AND NORTHERN MANITOBA

VOLUME 1, NUMBER 9 WEDNESDAY, SEPTEMBER 14, 1960 THOMPSON, MANITOBA

LESTER PEARSON

NEW YORK (CP) — Lester B. Pearson, Canadian Liberal party leader and former external affairs minister, has been elected international executive chairman of the Council on World Tensions council President Everett R. Clinchy announced Sunday.

His appointment is the first step in a five - year program aimed at dealing with current tensions in constructive ways that can lead to a freer and more peaceful world, the announcement said.

New Thompson Business Buildings

Thompson's Station Road, along which is designated the town's industrial area, will have three new modern places of business, it is expected, before freeze-up.

As previously announced, Thompson Cartage will have a large warehouse together with an office. Milton Koutecky and the Hudson Bay Plumbing are both proceeding with the construction of places of business, and workshops.

Now in various stages of construction are a great many new homes. Permits have been issued for 75 new homes and eight seven-family apartments. The owners and builders of these new homes are now entering a race with the weatherman, but 1960 prospects for homes for another 125 or so Thompson families are at this time very bright.

MONTHLY MEETINGS ATHLETIC ASSOCIATION

Following Wednesday evening's meeting of the Thompson Athletic Association the Thompson Citizen hopes to have for publication in the next edition an announcement of plans for a 1960-61 winter sports program.

Meetings are held on the second Wednesday of each month. All who are interested are welcome to the meetings.

Who's New?

MATHESON - Pat and Don are happy to announce the birth of their daughter Lisa Beth, weight 8 pounds, 10 ounces at Thompson Hospital, on September 4, 1960.

* * *

BENNY - Barry and Maureen Benny wish to announce the birth of their son Byron Andrew, who weighed 8 pounds, 9 ounces, at the Thompson Hospital on September 3, 1960.

MRS. V. FREED ASSUMES EDITORIAL, ADVERTISING DUTIES WITH CITIZEN

The publisher of The Thompson Citizen announces the appointment of Mrs. Verna Freed as editorial and advertising manager.

The new representative who will take over her duties with the September 21 edition, came to Thompson from Port Arthur, Ontario, where she spent five years on their teaching staff.

Mrs. Freed's newspaper experience includes time on the Sioux Lookout Times, as their Hudson reporter. While there she also had considerable experience in advertising layouts.

It would be appreciated if those who have news articles would phone Mrs. Freed at 7-2063.

350 Students Attend Thompson School

A second elementary school, in Thompson's North Loop, to be completed by Christmas, and a new high school for the fall of 1961, are local educational plans, The Thompson Citizen has learned.

There are now 350 students in the Thompson School, and Principal S. V. Brickman reports a continuous influx of students from nearly all Canadian provinces. With a second temporary class room being prepared in the school auditorium, and the teaching staff now totals 14, as follows:

Grade 1, Miss Lynn Boyd.
Grade 1, Miss Elaine Inkster.
Grade 2, Miss Peggy Bjornson.
Grade 2, Miss Connie Thompson.
Grade 3, Mrs. Mildred Pascal.
Grade 4, Mrs. Essie Lyons.
Grade 5, Wm. A. Taylor.
Grade 6, Mrs. Lorraine Greasley.
Grade 7, Mrs. Isabel Hutchison.
Grade 8, Miss Norah Stewart.
Grade 9, Stan V. Brickman.
Grade 10, Miss Viola Johnson.
Grade 11, Miss Florence Ricktik.
Grade 12, Robert F. Dyne.

The area for the new high school has been cleared and stripped and soil testing is now being carried out. Plans are now being finalized.

Year's Total Of TB—184

A total of 184 cases of tuberculosis have been reported in Manitoba this year, according to the weekly report of communicable diseases released by the provincial health department. The department lists four new cases for the past week.

A Name Needed

Gordon Beard, proprietor of the coffee shop at the Thompson Inn, is still anxious for more to participate in the competition to name the dining room which he will begin operating this fall, also at the Thompson Inn.

The person who suggests the winning name will receive as a reward one hundred bright new silver dollars. Entries are accepted at the coffee shop, or they may be mailed.

Who can come up with a different name, perhaps one that suggests something of the development of Thompson, the accomplishments of the people of northern Manitoba, or.....?

Let's Eat

BY

IDA BAILEY ALLEN

TOMORROW'S DINNER

Spring Salad Greens
Tossed with Cut Young Onions
Glazed Smoked Pork Butt
New Potatoes in Egg Cream Sauce
Green Peas with Ford Hook Limas
Jellied Fruits Whipped Cream
Coffee Tea Milk

Measurements are level; recipes for 6

Glazed Smoked Pork Butt: Boil 2 to 2½ lb. smoked pork butt in water to cover about 2 hrs. or until tender. Drain

Place on rack in baking pan.

Pour over ¼ c. vinegar drained from sweet pickles.

Cover with ¼ c. brown sugar mixed with ½ tsp. pastry spice, ¼ c. fine dry crumbs and ½ tbsp. table mustard. Bake 45 min. in slow oven, 325 deg. F.

New Potatoes in Egg Cream Sauce: Scrape 2 lbs. small new potatoes. Boil in salted water; drain.

Pour over 2 c. egg cream sauce.

Turn to coat potatoes; heat.

Serve dusted with minced parsley.

Egg Cream Sauce: Prepare 2 c. medium white sauce as usual, but for liquid use 1¼ c. milk or light cream and ¾ c. water containing ½ tsp. chicken bouillon powder.

Add 4 chopped hard-cooked eggs.

TRICK OF THE CHEF

Before putting gelatin desserts to refrigerate and mold in custard cups, first rinse the cups with cold water and dust the interiors with granulated sugar. Refrigerate until firm.

They will be easy to unmold and, when the dessert is turned out, a little pleasant-flavored syrup will be in the bottom of the dish.

RECREATIONAL DEVELOPMENT SHOULD PARALLEL THOMPSON'S BUSINESS AND RESIDENTIAL GROWTH

Thompson is beginning to grow up, and the wisdom of long-term planning for the town site is already becoming evident. A steady increase in population will be the pattern from here, providing the supply of new homes can match Inco's aggressive development program.

Within a year there will be perhaps a hundred places of business in Thompson. The contemplated rapid growth of the town will obviously be paralleled by the construction of new schools.

For this pattern of careful foresight and planning credit must go initially to Inco and to the officers of the provincial government; now the carrying on of orderly town business and orderly planning is the responsibility of the administrator and his staff. This is a very heavy responsibility, and it is our observation that a top-notch job is being performed by the public servants of that office, but with the community expanding as it is there must come an undertaking from the residents themselves for various community projects.

The need for a community meeting place is a prime requisite. The local school is so crowded that it has become necessary to establish class rooms in the auditorium, the theatre is performing a wonderful community job in making its premises available for church services and local meetings, but even now the problem of a meeting place is acute.

Thompson has two sheets of curling ice and an open skating-hockey rink. It has no community library, no athletic centre for young people and no community hall for social functions.

The Thompson Citizen suggests that recreational and meeting facilities should parallel plans for business development, educational facilities and town planning.

It is to the credit of interested townspeople that an athletic association was formed last spring, and the organization has had a successful summer season. Perhaps the Thompson Athletic Association could be the beginning of a group to plan a community centre for Thompson.

Just in passing, the publisher has noticed that quite a number of Thompson men are wearing badges of the Lions Club. The time has come, we think, for a service group to organize and help with the building of Thompson.

In this rambling editorial we are simply attempting to stress the need for planning by the community of recreational and meeting facilities. The need for a community centre should be carefully considered now, and it is our opinion that in one area there should be perhaps ten sheets of curling ice, a covered skating arena, a community hall with facilities for meetings of large and small groups, a library and reading room and a centre for a local youth's club.

All of this, of course, would call for a great deal of careful community planning, a long-term financial arrangement for a large investment, and continuous interest by those who are residents in Thompson.

The people who come to northern Canadian mining towns are a breed unto themselves. They are capable of accomplishing wonders in a community: we suggest that a recreational centre should at an early date have the attention of many.

Thompson Town Notes

Claude Henderson, O.B.E. and Mrs. Henderson, who have been visiting their son and daughter-in-law, Mr. and Mrs. Dave Henderson, this past month, left Sunday for a visit to Banff and a ten-day visit to Montreal before sailing aboard the "Manchester Pioneer" for their home in Kingham, Oxfordshire, England. While here Mr. Henderson was particularly impressed by the Canadian enterprise and spirit in building a modern town with such speed in a setting of northern wilderness.

* * *

The many friends of Shirley and Colin Read will be pleased to hear that while aboard the R.M.S. Saxonia, Mr. Read was notified that he had won a $2,500 scholarship in economics at the University of London.

* * *

Mr. and Mrs. Albert Hutchison have returned from a month's holiday. While away they visited in Sudbury, Regina, and Flin Flon.

* * *

E. E. Robertson of Winnipeg Supply is a business visitor in town this week.

* * *

Miss Faye Samuels is visiting for a few days with her parents, Mr. and Mrs. G. R. Samuels, before she leaves for the University of Sasktachewan, where she will be taking her second year Arts Course.

* * *

Darwyn Samuels arrived home Tuesday after a holiday in Winnipeg, Grandview and Canora.

* * *

Mr. and Mrs. T. E. Fetter and their daughter Elaine are guests of their son and daughter-in-law Rev. and Mrs. L. Fetter. They are enroute from Kitchener to Calgary, where they will make their new home.

* * *

Mr. and Mrs. H. G. Hess and family have returned from a month's holiday in Napanee and Detroit. The highlight of their trip was seeing the International Harmsworth trophy race on the Bay of Quinte, where Canada, for the second consecutive year won with "Miss Supertest".

* * *

Miss Marilyn Hawkins left Monday for Winnipeg, where she has enrolled in second year science at United College. She was accompanied by her father R. Hawkins, who will be spending a few days in Winnipeg.

* * *

Robert Etches, of the engineering department, left Wednesday for Winnipeg, where his marriage will take place at the Crescent-Fort Rouge Church, on Saturday, September 17, to Miss Margaret Merryl, daughter of Mr. and Mrs. Harold McKay of 162 Westgate, Winnipeg.

* * *

Mr. and Mrs. Harold Brown have left for a holiday in Edmonton; while there they will be guests of their daughter.

* * *

J. Grant McConnell left Friday for Winnipeg to register in the first year science course at the University of Manitoba.

* * *

Mrs. S. Sieffert of Flin Flon is a visitor this week in Thompson at the home of Mr. and Mrs. J. Sawchuck.

* * *

Dave Armstrong returned Tuesday after spending a two-week holiday in Sudbury and district.

* * *

Jim McIvor left Wednesday for Winnipeg, where he will act as usher at the Etches-McKay wedding of September 17. After a short stay in Winnipeg, Mr. McIvor will proceed to Grand Forks, Mich., where he will be taking a physical education course.

NICKEL

(From a paper presented to the Royal Canadian Institute in Toronto on November 14, 1959, by K. H. J. Clarke). (Continued from Last Edition)

In 1929 The Mond Nickel Company Limited was merged with The International Nickel Company of Canada, Limited. Mond was developing its properties adjacent to those of Inco in the Sudbury area. The two companies discovered that what they thought were two ore bodies which they were developing separately was, in fact, a single ore body. The ore deposit turned out to be the Frood-Stobie, the largest nickel ore occurrence discovered up to that time. If this property were to be developed through two separate operations, it was apparent that a large part of the shafts and underground development to extract the ore, as well as the surface facilities to handle it, would have to be duplicated. Only under a single long-term mining plan would it be possible to develop the entire ore body so as to ensure the full utilization of the ore. The merger allowed The International Nickel Company of Canada, Limited to plan the orderly and effective development of the Frood-Stobie ore body. The Mond refinery at Clydach, Wales, close to the British industrial markets, as well as the rolling mill and research laboratories at Birmingham, England, and the precious metals refinery at Acton, England, became part of International Nickel. This enabled the Company to serve the European market much more effectively.

* * *

Now we move on to a scene in September 1939. The German armies had invaded Poland. Britain and France had declared war. Huddled together over a sheaf of data sheets in a laboratory in Birmingham, England, research metallurgists of The Mond Nickel Company, Limited were in consultation with aeronautical engineers charged with the responsibility of designing aircraft engines which would play such an important role in the struggle for survival which was to take place during the next five years. A metallurgical breakthrough had taken place. The Nimonic series of high nickel alloys developed by Mond, had been under accelerated high temperature tests. The results were available at last. Alloys had been produced which could stand the searing temperatures envisaged by design demands. The jet age was under way.

International Nickel's policy of research and development which brought great expansion of peacetime uses of nickel had also made necessary greatly expanded production facilities. The outbreak of World War II had found the Company well equipped to support the war production effort of the Allied Nations. Nevertheless, crisis after crisis followed in the years to come.

Very soon the demand for Canadian nickel for war production made it possible to supply all the civilian uses it had taken so long to cultivate. By means of a distribution system based on priorities, the total output of Canadian nickel was made available to essential industries.

Churchill Complaints

Some months ago a senior official of the board of grain commissioners said that one of the factors that placed a ceiling on wheat shipments from the port of Churchill was the problem of interesting new buyers in using the port.

He pointed out that nearly all the wheat moving through Churchill was destined for Britain. Norway took only three cargoes a year and Germany only a small amount of Churchill-shipped grain.

Why are countries other than Britain not interested in using Manitoba's northern seaport?

A contributing factor is almost certainly the bad reports about Churchill that have been circulating in shipping circles in recent years. Two years ago the Baltic and International Maritime Conference registered loud complaints to the effect that ship owners and ship charterers lost money because vessels had to wait too long at Churchill for clearance. They blamed delays on lack of sufficient berths and of port personnel.

Similar criticism was leveled by the Commonwealth shipping committee.

These complaints are still being heard. The Commonwealth group in its 1960 report on the Hudson Bay route charges that delays are becoming worse. It claims that 44 ships lost a total of 127 days waiting for berths in 1959 as compared with 24 ships losing 55 days in 1958.

This kind of publicity certainly is doing Manitoba's seaport no good among potential users.

The federal government has plans to provide additional facilities which will speed things up at Churchill. Ottawa should make sure the new accommodations are ready for the opening of the 1961 navigaiton season.

New Automated Milling Plant

A new, highly automated milling plant with a daily capacity of 6,000 tons of ore was recently put into operation by International Nickel at its Levack Mine in the Sudbury District of Ontario. Built at a cost of $12,000,000, the plant makes extensive use of instrumentation to permit centralized control of crushing, grinding, flotation and dewatering processes involved in the production of concentrates from ore.

NICKEL

(From a paper presented to the Royal Canadian Institute in Toronto on November 14, 1959, by K. H. J. Clarke). (Continued from Last Edition)

In 1940 the Germans overran Norway. The refinery of the Falconbridge Nickel company in Norway was lost to the Allies. The International Nickel Company of Canada, Limited undertook the refining of the complete Falconbridge output.

The year 1940 also saw the fall of France. Nickel ores mined in the French island of New Caledonia were shut off from Le Nickel's refinery in France. The International Nickel Company installed emergency refining at Huntington, West Virginia, and refined materials from this source for use in the allied war effort.

And still allied governments asked for more and more nickel. Facilities were pushed to the limit. In fact, more INCO ore was processed during World War II than in the entire prior 50 years of the Company's existence.

As mentioned previously, when ore was first discovered in the Sudbury area, early prospectors thought it contained only copper. Later, it was found to contain ever more nickel than copper, and when the separation process was developed International Nickel became a source of both metals. For years the Company has been Canada's largest nickel and copper producer.

It had long been known that the ore contained many elements besides nickel and copper, some of them in minute quantities. In addition to the difficult technical problems associated with finding methods to recover the other elements, they had to be obtained at a cost which would leave a profit.

As time went on, INCO research metallurgists did develop economical methods to recover these other elements. First came the precious metals---gold, silver, platinum, palladium, rhodium, ruthenium and iridium. After that came the recovery of selenium and tellurium.

Sulphur gases from INCO's smelter are treated in large and increasing quantities for conversion into marketable industrial products.

In 1954, after producing cobalt salts for many years, INCO began the production of electrolytic cobalt. And in 1956, in a $19,000,000 plant, INCO commenced the recovery of an exceptionally high grade of iron ore.

So now, 14 different elements are being extracted from INCO's Sudbury ores.

Back and forth, back and forth, above the lonely regions of Northern Manitoba in 1948, an aeroplane trailed on a cable beneath it a strange, bomb-shaped object. This was International Nickel's new airborne magnetometer survey outfit---the first of its kind ever employed in geological exploration. It has been thoroughly tested over the known ore deposits of the Sudbury Basin. Now it was being put to work in virgin country in Manitoba's northland where there was an almost complete absence of ore outcroppings. Electro-magnetic signals, sent down from the aircraft, were relayed back through the towing cable to a chart recorder in the plane, while a continuous-strip camera synchronized with the recorder made photographs of the flight line. Later, geophysicists examined the charts for irregularities possibly caused by the presence of sulphide ores, and these interesting areas were pinpointed from the film strip. In the year 1948 alone, INCO's sky-riding prospectors flew as much as 28,000 miles. On the ground, INCO geologists and geophysicists with drill crews fought their way through brush and muskeg.

THOMPSON HIGH SCHOOL PLANS STUDENT COUNCIL

Just as the Republican and Democrat campaigns are gathering momentum, so the Blue and Gold Parties at the Thompson High School are trying to convince all students that their slate of officers for Student Council are preferable on every count.

The two parties formed from the junior high grades 7 and 8 and senior high grades 9 to 12 have drawn up the following slate of officers:

BLUE PARTY:
President, Ken Delaney.
First vice-president, Bob Thornborough.
Second vice-president, David Armstrong.
Secretary, Sybille Muehrer.
Treasurer, Micky Reginbal.

GOLD PARTY:
President, Phil Gies.
First vice-president, Darwyn Samuels.
Second vice-president, Dave Chaddock.
Secretary, Eileen Mick.
Treasurer, John Nesbitt.

After two weeks of campaigning which will include speeches, banners and slogans and voting will take place Friday, September 23.

As in politics an entire slate of officers will not win the popular appeal, and eventually members of each party will hold office in the Thompson High School Student's Council.

Thompson Viewpoint

The problems of the huge mounds of gumbo at the curbs is rapidly disappearing as the landscapers move in. Juniper Drive is taking on a new look as the boulevards are being levelled and coated with black top soil. This week brought a great change to Riverside Drive with new sidewalks, curbs and landscaping. We can hardly wait to see all the beautiful lawns next spring, although the sight of the black loam professionally graded is worth a sight seeing trip around.

* * *

Did you ever notice how busy our school grounds are even after school hours? The swings, ladders and sand boxes are filled with children. The bright benches are constantly in use by mothers walking their young children. That equipment was surely a good investment.

* * *

With the opening of fall activities, the most often heard remark is "Where will we hold it?" With the rapidly growing school enrolment it has become necessary to divide the school auditorium into classrooms. We certainly comment this, as good education for our children is of the most importance. The work of Sunday Schools, Cubs, Guides, Orchestra practices play their part too, and space will no doubt be found by their interested leaders. However has anyone enough room for ten squares of the "Circle 55" Club? Now there's a challenge!

* * *

The very patient people who so generously loaned their Christmas tree lights to the Athletic Association can look forward to getting them back very soon now. They have not been forgotten.

* * *

With our brisk autumn weather comes the delicious aroma of homemade pickles and jams. With it comes the question of who has any empty jars? One enterprising but unambitious housewife already has a well stocked shelf, donated as thank-yous for the loan of jars she is not using herself. It is an ill shortage that doesn't blow somebody some good.

* * *

There are a number of prizes from the last Athletic Association dance held at Monarch Lumber Company's New Building which have not yet found their owners. These prizes will not be delivered, so would the winners please pick them up at the home of Neil Adams?

JACK JOHNSON SETS THE PACE

At an agency dinner held in the Royal Alexander Hotel in Winnipeg just recently, Jack P. Johnson, Crown Life Agent, whose home and office is in The Pas and who has represented his Company in the townsite of Thompson since the first sod was turned and construction commenced here, was honoured four times in the same evening.

The above photograph shows Crown Life's Provincial Manager, Mr. S. G. Macnicol, presenting Jack with the Shel Macnicol Man of the Year Cup, which is offered for competition amongst all the Crown Life Agents in Manitoba and which Jack Johnson qualified for last year as a result of producing the largest volume of business of any Crown Life Agent in this province. This cup remains in Jack's possession for the balance of this year and is on display in his office here in The Pas.

Two home office officials from Toronto were present on this occasion and twenty-five Crown Life Agents from various parts of Manitoba were also in attendance. Mr. J. N. Cunningham, Q.C., vice-president and director of agencies, thanked Jack for his excellent work and J. M. Breen, assistant superintendent of agencies, presented him with a bronze plaque. This award represents the title of branch vice-president in Manitoba for 1959-60 and also qualifies Jack as a member of the Company's senior leader club. This membership calls for a minimum of a half million dollars of new business annually.

In addition to all the above, the occasion served as Jack's fourteenth anniversary as an agent for Crown Life, north of the 53. During these fourteen years, Jack has accumulated four plaques which are now shown in his office in The Pas. He won his first plaque in 1953 for top sales in Western Canada and with this award went the title of regional vice-president for Western Canada, in addition to branch vice-president for Manitoba. In 1955, he duplicated his 1953 records and held the titles of the two Vice-Presidencies for 1956-57. In 1958, he again became branch vice-president for Manitoba and now holds the same honour for 1959-60. In February, 1954, Jack was invited by Crown Life to the opening of the new eight million dollar Home Office in Toronto, where he was privileged to address the annual meeting of the company, being the only agent so invited at that time.

Winnipeg Wedding Of Local Interest

VINCENT-THOMPSON

Chalmers United Church was the scene of a double ring ceremony on September 10 at 2:00 p.m., when Kathleen Joane, daughter of Mr. and Mrs. H. J. Thompson, 952 Valour Rd., Winnipeg, exchanged marriage vows with John Stewart, son of Mr. and Mrs. C. Vincent, 137 Paisley Blvd., Crooksville, Ont. Rev. D. Pratt officiated. Orville Derraugh, soloist, was accompanied at the organ by Bruce Pippy.

The bride, given in marriage by her father, chose her full length gown of nylon organza over bridal satin. The V'd neckline was enhanced by a wide collar of chantilly lace. Sequins were scattered about the collar. A peplum of lace at the V'd waistline encircled the bouffant skirt to the back where a panel of shirred and tierred lace cascaded to a sweep train. A tiny lace pouf of tiers formed her headdress, which floated her fingertip veil. She carried a white Bible overlaid with a mauve orchid and stephanotis.

Miss Eileen Thompson, sister of the bride, was maid of honor, and Miss Helen Vincent, sister of the groom, was bridesmaid. They wore cocktail length dresses of organza in colors of pink and soft green respectively. Their headdresses were bands of shattered mums to match the gowns and cascades they were carrying.

Mr. John Klassen was best man. Messrs. Henri Enns and Cliff Dilts ushered the guests.

A reception was held at the Shamrock.

They will make their home in Montreal.

The groom is a graduate in Geological Science at Queen's University.

LOCAL DATES TO REMEMBER

The Guide Mothers Group will meet on Monday, October 3, at the home of Mrs. O. Breadickow at 2:30 p.m. The main topic on the agenda will be the discussion of selecting a suitable meeting place for the guides.

* * *

The Thompson ladies' community club will hold their first meeting of the season on Thursday, September 22 at the Administration Building at 8:00 p.m. All former members and all new residents are urged to attend. There are many town projects which need the community ladies' support so plan to attend.

An Accomplished Young Musician And Thompson Music Teacher

After a most successful first year of music teaching to the younger piano aspirants in Thompson, Miss Marcella Waschuck opened her fall classes this week. Marcella, daughter of Mr. and Mrs. John Waschuck, 28 Birch Avenue, began her musical career with lessons at the age of five in Swan River.

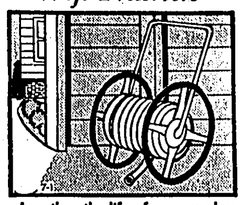
Among Marcella's teachers was Mrs. Pat Mossing, who is well known in the star of the Pat Mossing Show on Radio Station CJGX, Yorkton. Before coming to Thompson Marcella was tutored by Mrs. A. Wastaal, who has teaching degrees from the Conservatory of London and Paris.

Miss Waschuck is a versatile musician and is currently playing Second Tenor Saxaphone with the Thompson Nicklelites, a 15-piece orchestra newly organized in Thompson. Marcella is continuing her own piano studies and hopes for a musical career which would include judicating. Toward this end she has acquired a trombone and hopes to become proficient in all brass and wood instruments.

Miss Waschuck is an asset to our town musically and an inspiration to other young people here to continue their present musical careers and to engage in new musical endeavours.

Miss Tannis Smith, daughter of Mr. and Mrs. A. R. Smith, is seen playing for her music teacher, Miss Marcelle Waschuk.

Wife Preservers



Lengthen the life of your garden hose by keeping it out of the sun as much as possible, draining thoroughly after each use and storing in a cool place.

MEETING OF THOMPSON CATHOLIC ALTAR SOCIETY

The Thompson Catholic Ladies' Altar Society met at the home of Mrs. H. King on Monday, September 12 for the first meeting of the fall season.

The election of officers will take place at the next meeting, which will be held on September 26 at the home of Mrs. N. Novikoff, 215 Juniper Drive. All Catholic ladies are urged to attend and a special welcome will be afforded to new members.

A Name Needed

Gordon Beard, proprietor of the coffee shop at the Thompson Inn, is still anxious for more to participate in the competition to name the dining room which he will begin operating this fall, also at the Thompson Inn.

The person who suggests the winning name will receive as a reward one hundred bright new silver dollars. Entries are accepted at the coffee shop, or they may be mailed.

Who can come up with a different name, perhaps one that suggests something of the development of Thompson, the accomplishments of the people of northern Manitoba, or.....?

Lighter Crankshafts

Hollow automobile crankshafts made of ductile iron are about 40 per cent lighter than those made of forged steel.

Thompson Catholics Building

At the corner of Cree Road and Deerwood Drive new buildings are shaping up nicely. They are the Rectory and the hall of the Roman Catholic Church. Until a church proper is built the hall will be used for Mass and other liturgical ceremonies. It is after almost two years of planning and consulting that a start has been made toward realization of this project. We are very grateful for the help given in this respect by individuals and companies with suggestions and work.

The final design was drawn by Paul Loebel, architect of Flin Flon and Bernardin Construction of Elie, Manitoba, is the contracting firm.

Twenty two days after the start, the workmen and the wives of two of them could establish their living quarters in the new Rectory. This building measures 42 x 30 ft., has a full basement and has already the commodities of Thompson: running water, sewers, electricity. The telephone will be installed soon.

The two buildings are on slabs. Here are some figures: the one under the rectory is 8 inches thick, reinforced by iron rods. The Hall, 98 feet long and 38 feet wide, sits on a slab of concrete, 30 inches thick at the footings, reinforced by 12,000 lineal feet of 1, 3/4 and 5/8 inch iron rods. The structure is of laminated wood arches, 22 feet high Since the edifice will be used as a church, an altar and other facilities will be useful for gatherings, dinners and other entertainments.

It is hoped that most of the finishing work will be completed by the end of October. This will be the reward for the patience of parishioners and the friendly help that has been received from the town authorities, the Officials of Inco and of other companies during the last year.

THE THOMPSON STORY BY CBC T.V. AND RADIO

The CBC is sending Thompson to Canadians from coast to coast. On October 18, the Transcanada Radio Network will present a half hour documentary, titled "Town In The Wilderness." This will tell the story of the modern miracle of the construction of the mine, and of the lives of the people who are making their homes here. On October 22nd, the Television Network will show viewers the town, the mine and the people at work and at play. The TV show is titled, "Wilderness Oasis". Producing both programs is David Cruickshank, Outside Broadcasts producer from Winnipeg. Director-cameraman, is Paul Guyot of Winnipeg. Arriving later this week will be radio technician Ernie Drouin, also of Winnipeg. The TV show presents the most production problems, and townspeople will likely see the cameras located at many widely separated locations during the next ten days. If the weatherman can give us some bright sunny weather, the boys hope to be completed by October 1.

Both programs will be similar in content. However the TV show will be able to tell the story more vividly. The show will open in the air, as a float plan brings the cameras over the bush and gradually open onto the modern development below. From there, general shots of the town and people in daily action. We conclude this series of pictures in the school yard with the children at play. From here we meet the people. First a young teen-ager going about at a store etc. The man is followed through his daily life also. In all three cases these people will be shown at work and at recreation. In the case of the man, he will be seen at the Inco plant, and during the presentation will be shown the magnitude of this part of the Thompson story.

In all cases, the people shown will be chosen for their ability to speak well, as their own voices will be recorded and used to tell the story. The program concludes with general shots of the town and people, and finally winding up with a look at the future. New construction and developments which are either under way or planned. In the radio show, Mr. Cruickshank will use his own voice to tell the story, along with townspeople he will interview.

By the way you might be interested to know that Cameraman Buyot put Thompson on the TV news this week, with pictures he took of the first snow on Wednesday morning.

STUDENT COUNCIL ELECTION RESULT

At the election held on Friday afternoon at the Thompson High School, the following were elected to the student council.

President, Ken Delaney.

First Vice-President Bob Thornborough.

Second Vice-President, David Armstrong.

Secretary, Eileen Mick.

Treasurer, John Nesbitt.

Thompson Student Wins Scholarship

It has been announced by the Manitoba Department of Education, that Ken Delaney of the Thompson High School has, through his excellent standing in the recent department of education examinations, become eligible to hold a University of Manitoba Alumni Association scholarship.

The terms are such that the recipient will complete his Grade XII standing during this term and enter the University in the year immediately on completion of Grade XII.

Ken plans to use his scholarship next year, when he will enroll in the Science Course at the University of Manitoba.

200 AT UNIVERSITY THROUGH MANITOBA BURSARY AWARDS

Freshmen who are now converging on the University of Manitoba campus include 200 young men and women who have been awarded Manitoba government bursaries worth $63,450.

Hon. Stewart E. McLean, minister of education, said Friday that this figure includes awards totalling $25,000 to 72 students under the Queen Elizabeth Bursary Fund established a year ago.

The minister noted that $159,000 of the $179,000 total awarded to 735 students, to date, under the government student assistance program has been allocated to 563 students at various levels of university training. Mr. McLean said that the remaining $20,000 of the total was awarded to 284 students who attended professional teacher training courses or academic classes during summer sessions.

In addition to the $179,000 awarded so far this summer and fall, applications for government financial aid are being processed from 227 secondary school students, along with others from students wishing to attend technical education courses during the winter. Mr. McLean said that applications for financial assistance were received from a total 1,905 students.

The prominent elevations of the Rocky mountains extend for 2,200 miles through the United States and Canada.

Thompson Town Notes

Mr. and Mrs. R. Stoker from Nokomis, Saskatchewan and Miss Sharon MacDonald, who is taking a laboratory technician course in Saskatoon, are visiting in Thompson on the occasion of the 25th wedding anniversary of their parents, Mr. and Mrs. Don MacDonald.

* * *

Mrs. R. L. Taylor, who has been visiting her son-in-law and daughter Mr. and Mrs. D. Metheson for the past ten days, has returned to Prince Albert.

* * *

Mrs. O. Bart, wife of Dr. O. Bart, smelter consultant in Thompson, left Wednesday after a three-month visit for Toronto, where she will be a guest at the home of her son-in-law and daughter, Mr. and Mrs. I. Sovik. After a months' visit in Toronto she will be joined by Dr. Bart, when they will leave for their home in Stockholm, Sweden. Mrs. Bart wished to express her gratitude for the kindness and friendliness she experienced while in Thompson. She was particularly overwhelmed by the rapid progress found in the building of sidewalks and homes during her three-month visit.

* * *

Mr. and Mrs. A. M. Cameron spent the past week-end in Saskatoon, where they attended class reunions at the University of Saskatchewan.

* * *

Mr. and Mrs. E. McIvor left Monday for a month's holiday in California. While there they will be guests at the home of Mrs. McIvor's brother-in-law and sister, Mr. and Mrs. R. F. Peterson of Los Angeles.

* * *

Mr. and Mrs. F. Aggiss of Conston are spending a two week holiday with their son and daughter-in-law Mr. and Mrs. W. Aggiss, 24 Hickory Avenue.

* * *

W. Armstrong left this week for Provost, Utah, U.S.A. where he will continue his studies at the Brigham Young University.

* * *

Mr. and Mrs. G. Armstrong left Monday for a month's holiday in Sudbury, Philadelphis and points south.

* * *

M. and A. Belanger of Port Arthur, and Bert Honath of Montreal, are business visitors in town this week.

Abrasing-Resisting Cast Iron

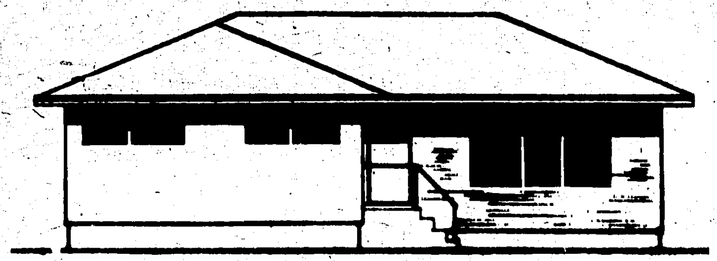
Presenting A Thompson Home For Local Inspection



Thompson's first model home, slated to be opened for public inspection will be completed October 30, by Saturn Construction. It is located on Riverside Drive. The model home will be of the bungalow type, and will be completely furnished by the Hudson Bay Company in Thompson.

This home will have many exciting features, which will please the ladies of Thompson. The kitchen will have complete mahogany cupboards with a copper-tone hood over the stove area. The bathroom will feature the beautiful American standard coloured bathroom fixtures with built in vanities. There will be complete hardwood floors of oak, except in the kitchen, bath and entrance way.

These homes will have complete brick fronts, or if preferred a choice of partial brick, stucco and siding. To contend with local foundation problems the homes will be built on a solid steel beam with steel reinforcements in the concrete walls. The chimney will be of the boxed style.

Saturn Construction, a newly formed Company in Thompson, has as its manager M. Trimble, with Norm Einarson as superintendent. The sales and administration will be by Thompson Supply Company with Arne B. Sorenson in charge. The sales will be completed by the following salesmen: Art LaFontaine, Tim Filuk and Nick Schwanhausser.

These homes built on Riverside Drive will certainly be considered some of the most beautiful in Thompson.

Excellent Organization High School Activities

S. V. Brickman, principal of the Thompson High School, has presented the student body with a well organized plan for high school activities. This will include these committees:

STUDENT COUNCIL, which will under the supervision of Mr. Brickman be responsible for the General Administration of School Activities.

ATHLETIC COUNCIL, which will promote school sports and the possible Field Day. Mr. Dyne will be in charge.

PROGRAM COMMITTEE, with Miss Richtik will plan programs for assemblies, parties and special events.

PUBLICITY COMMITTEE which will write up stories of school activities and be in charge of any school books decided upon. Miss Johnson will supervise this group.

LITERARY COMMITTEE, with Miss Stuart, will work with the program committee to plan any Literary items for assemblies, plays, etc.

GIRLS' COMMITTEE, which will look after school teas on visiting day and will be supervised by Mrs. Hutchinson.

Monel nickel-copper alloy tubes, used for feedwater heaters, are produced in lengths as long as 85 feet.

NICKEL

(From a paper presented to the Royal Canadian Institute in Toronto on November 14, 1959, by K. H. J. Clarke). (Continued from Last Edition)

INCO's far-flung exploration program, curtailed during the war, was being vigorously renewed, with particular attention to Manitoba, where interesting geological formations had been observed.

In 1949 a trapper-prospector reported a small sulphide showing on the shore of Mystery Lake. In due course, INCO's magnetometers recorded favourable indications in the Mystery and Moak Lake areas, and mineralized formations were later discovered in both locations. By 1952 an extensive diamond-drilling program was under way to determine the value of these deposits. To study the Moak Lake ore body at depth, a 1,300-foot mine shaft was sunk in 1955 from which to carry on underground exploration. The general picture was encouraging but there was not enough nickel ore of sufficiently high grade to make mining practicable and economic.

But in Februarv, 1956, came the break. Twenty miles southwest of Moak Lake the Thompson ore body was discovered. This deposit proved so intriguing that as many as 30 drills were soon in operation there. Drilling results indicated that an economic ore body had been discovered at long last.

Ten years and ten million dollars had already gone into the search for and the development of these deposits. Without hesitation and with the co-operation of the Manitoba Government, INCO set about developing an operation second only to its own Sudbury district enterprise. And this further development was to involve a total expenditure of $175,000,000.

It is rather difficult to grasp the immensity of the program which is being carried out in this area 400 air miles north of Winnipeg. A 30-mile spur already links the Thompson Mine with the Canadian National Railways' line which terminates at Churchill on Hudson Bay. Fifty-three miles northeast of Thompson on the Nelson River the Manitoba Government by 1960 will have completed a power development project to take care of present and foreseeable power requirements.

At the Thompson Mine, development and production shafts are completed and underground exploration is proceeding on schedule. Concentrating, smelting and refining facilities are nearing completion. Mining and milling operations will commence on schedule in 1960.

In a location, which three years ago was bushland, the town of Thompson will provide accommodation for an initial population of 8,000 people.

The discovery at Thompson and subsequent development of the mine, smelter and refinery have given the industrial world the assurance it wanted---abundant supplies of nickel for the foreseeable future. The development of world-wide nickel markets can forge ahead in the knowledge that the demand can be met by supply.

Estimates place free world nickel-producing capacity in the year 1961 in the order of 650,000,000 pounds, including INCO's own estimated producing capacity of 385,000,000 pounds---310,000,000 pounds from the operations in the Sudbury district of Ontario and 75,000,000 pounds from the new Thompson property in Manitoba. In 1958 the free world consumption for both civilian and defence purposes was about 320,000,000 pounds. From these figures you might think that it will probably take some time for consumption to catch up with producing capacity. And no doubt it will. But a great many new developments are taking place in the world today which show a real potential for nickel usage.

Take the automotice industry, for instance, which is already the largest single market for nickel steels. Even more nickel is going to be used in this industry from now on because of new steels developed by International Nickel research. These are not only better, but cheaper, than the steels they are replacing.

Recent improvements in nickel plating processes give a more attractive and more durable finish which should enlarge the market for nickel in the automotive and also in other fields.

More nickel should find a market in heavy motive equipment, especially road-building and earth-moving machines, to minimize maintenance costs.

Steps are now under way to adapt the gas turbine to replace piston engines in trucks, buses and perhaps passenger cars. INCO is co-operating with automotive engineers in this development. Very soon it is expected that there will be a gas turbine engine installed on an experimental basis in one of the ore haulage trucks in the Frood Open Pit. To make gas turbines practical for automotive uses it was necessary to develop nickel alloys capable of carrying high loads at white heat. An automobile gas turbine engine would use 20 times as much nickel as a piston engine.

Of interest is a project in hand for construction of highway bridges by forming and welding high strength stainless steels. These light-weight sections can facilitate bridge construction and practically eliminate bridge maintenance costs.

And what about nickel in the railways? An inspiring sight today is the C.P.R. vista dome train, "The Canadian," streaking from coast to coast, its 8% nickel all-stainless steel body gleaming in the sun. The dust of the prairies is readily removed by putting the whole train through a "minute wash" in Calgary, which leaves it shining like new. Forty percent of the railway passenger car bodies built in the United States since 1952 have been made of stainless steel which reduces maintenance costs and gives increased durability.

There should be an enlarged market for nickel in connection with the handling and transportation of liquefied gases at sub-zero temperatures. INCO research has developed a 9% nickel steel that retains toughness at temperatures as low as 320°F below zero.

And now let us take a look at the future of air travel and its relation to nickel usage. Today, jet engines are well on the way to replacing piston engines in commercial air transportation. The power plant of a Boeing 707 jet-powered plane contains about two tons of nickel, or five times as much as that of a piston engine transport which the jets will replace.

Flight by means of rocket power will be principally of military interest for some time to come. But already the field is providing a market for nickel in the tubular components of liquid-fuelled rocket engines; for nickel-stainless steel for the skins and fuel tanks of these rockets; and in the form of a high strength nickel steel for the shells of solid fuel rockets.

When aircraft fly at supersonic speeds, the heat generated by the frictional effects of the atmosphere is so great that the wings and fuse-

CAN YOU TOP THIS?*

A TOAST TO JACK WELLS, WINNIPEG, FOR THIS STORY

Golf is a game that tests the nerves of even the most placid soul. Tournament golf is even tougher.

In the Canadian PGA at Niakawa in 1960, a field of 87 of Canada's top pros were battling it out for first place prize money.

During the final round, with Bill Kerr of Beaconsfield, Montreal leading by a couple of strokes, and playing in a threesome with Lyle Crawford of Vancouver and Alan Johnson of Montreal, they reached the 16th hole, a par five.

All had long tee shots.

On their seconds, Crawford was close to the pin — Kerr reached the green but had a thirty foot putt, and Johnson was short.

Being away, Johnson shot first and chipped in for an eagle three. Kerr, faced with a long curling putt, canned it for an eagle, and Crawford, who had a short two foot putt, dropped his.

Three eagles in the same hole in the same threesome in competitive golf!

If you can top this, write in to: "The Sportsman's Corner," 137 Colony Street, Winnipeg.

CONCLUSION OF NICKEL STORY

(Continued from previous page.)

lage have to be made of heat-resisting alloys that contain nickel. The first really high-speed aircraft, the Bell X-2, was built principally of INCO's "K" Monel age-hardenable, nickel-copper alloy. The latest candidate in this field, the North American X-15, the manned satellite, is made mostly of another INCO alloy, Inconel "X" age-hardenable, nickel-chromium alloy. As speeds of travel through the earth's atmosphere into and out of outer space go higher and higher, even more heat-resistant alloys will be required. It is certain that nickel will find a prominent place in the space-travelling missiles and aircraft of the future. It is of interest that the entire skin of the Atlas ICBM, now racing around the earth is made of an 8% nickel stainless steel.

These are just a few of the developments which lead us to believe that nickel will play a significant role in the world of tomorrow.

So now I have come to the end of my story.

I have told you of nickel's ups and its downs, its trials and its triumphs, from those far-off, prehistoric days when it came down from the heavens as a gift to mankind to the present when it is being called upon to go back into outer space to probe the mysteries of the universe.

A great many things have happened to nickel since that day, almost 100 years ago, when men began to build a railroad across Canada.

Thompson Viewpoint

With so many business visitors and new residents here, Thompson is singularly lacking in signs. However the R.C.M.P. this week mounted a most impressive plaque on the south entrance of the Municipal Building.

* * *

When R. Forrest, a recent business visitor here from Winnipeg, found the sidewalk outside the Thompson Inn strewn with nickels he commended International Nickel on its public relations. However being Wednesday, we are inclined to think it was some lad's "hobby money".

* * *

When the evening shoppers and the 9 o'clock theatre patrons exit on Friday nights, we realize that it won't be long before we see new "STOP" and "NO PARKING THIS SIDE" signs in the Plaza Area.

* * *

With the commencement of school it was a pleasure to once more see Our Country's Flag being raised and flying. Perhaps it won't be long before our other public buildings will acquire their Canadian Flags. It would be especially fitting if a flag flying at half mast could be seen on November 11---as a token of our Remembrance of those who served us in the past wars.

* * *

The first snowfall of the season greeted us on Wednesday morning, September 21. After raining intermittently for 12 hours the precipitation turned to snow and covered the town with about an inch of snow. Of course this all melted by noon and rubber boots were once more the order of the day.

* * *

With an increasing enrollment every day at our schools, this week saw the Grade three class split into two rooms. Mrs. June Alderson has taken over the new class.

LOCAL LEGIONNAIRES ARE SUPPORTING THE BOY SCOUTS

At the regular meeting of the Thompson Legionnaires it was decided to undertake the support of the local Boy Scouts.

As their next project, they are now finalizing the plans for a turkey shoot to be held in the near future. Watch for further notice of date and location chosen for the shoot.

Community Club Annual Meeting

The first annual meeting of the Thompson Community Club, Ladies Division, was held on Thursday evening, September 22, in the Council Chambers, Municipal Building. There were 53 ladies present. The President, Mrs. J. James welcomed the newcomers to Thompson.

The following business was completed; the club endorsed a motion to initiate action on the building of a Community Centre for Thompson. Three volunteers from the club, Mrs. J. James, Mrs. C. Nesbitt and Mrs. J. Munn are to approach the executives of other organizations in Thompson to learn their views and to organize a meeting to get plans underway.

The ladies also made arrangements for a fall fashion show, under the auspices of the Hudson Bay Company, to be held on the evening of October 23 in the theatre.

Other business completed was the amendment of the constitution. Ballots were distributed so that members might nominate ladies for the new executive, to be elected at the October meeting. A nominating committee, Mrs. Hnatuk, Mrs. Newman and Mrs. Denby, will interview nominees as to their willingness to let their names stand for election.

Meetings will be held on the second Tuesday of each month in the Council Chambers. The next meeting is October 11 at 8:30 p.m.

THE WOMEN'S GUILD SEPTEMBER MEETING

The Women's Guild of the Thompson Anglican Church met Tuesday evening at the home of Mrs. H. Peterson, Hillside Crescent. At the meeting, which was very well attended, the ladies made plans for a bake sale to be held Friday, October 7 in the dining room of the Thompson Inn.

Plans were made regarding the interior and exterior decorating of the new rectory. Sunday school and nursery class teachers were organized.

THOMPSON CHAPEL BIBLE NEWS

Sunday October 2 marks the start of a new quarter for the Sunday School of the Thompson Bible Chapel. If you, as an adult or young person, are interested in a Bible study program you are welcome as individuals or as a family.

The classes start each Sunday morning at 11:00 in the Burntwood Curling Club facilities. New songs, new lessons and new friends await you as you come. Materials used in teaching are published by the Scripture Press Foundation, Wheaton, Illinois and distributed in Manitoba by the Hull Publishing Co. of Winnipeg.

The Thompson Bible Chapel is an undenominational and evangelical missionary program in Thompson sponsored by the Continental Interior Mission, Inc. The purpose is to provide a Christ-centered and Bible-based Christian ministry for the benefit of those who wish it.

Mr. Correll will be away for several weeks at Whale Cove, N.W.T. where the mission will be erecting a new building among the Eskimos. Services will be carried on as usual in his absence.

ST. JOHN'S FEDERATION MEETING

At their first fall meeting, the Women's Federation of St. John's United Church in Thompson made plans for the welcoming of delegates to the Hudson Bay Presbytry, to be held in Thompson September 27 to 30.

Members gathered at the home of Mrs. Alan Cameron, Hillside Crescent, on Wednesday, September 21 with the President, Mrs. Ralph Hawkins, presiding over the meeting. Devotional period was led by Mrs. L. Fetter. Mrs. Carl Nesbitt reported on manse work in progress. Visiting committee reports told of many calls made on newcomers in our community, an important phase of our group work.

Detailed arrangements were made for the meeting of presbytry and the induction of Rev. Lawrence Fetter on the evening of Wednesday, September 28. Mention of the groups' handling of Regal Christmas cards was made with orders being accepted now by Mrs. J. Rutherford.

Ideas for a fall bazaar were presented, with work groups to begin immediately. The October meeting will be held at the manse.

Baseball Champs

The Pee Wee ball club of Thompson was a very active group this year, made up of boys in the five to eight year bracket. There were two teams in the league and they played their games once a week.

The championship was granted to the team that won the final game in the series. Each boy in the league will be presented with a Crest. The winners of the league will have "Champs" included on their crests.

The Pee Wee players pictured above are front row: Dennis Watson, Glen MacDougall, Jim Gray, Second row: Bruce Goddard, Ron Johnson, Gerald, Sandy Johnson, Bob Gray. Third row: Miles Faikney, Bill Gray, Guy Fornier, Keith Nesbitt, John Gray. Back row: Mr. D. Gray (coach), Bruce Goodman, Jordon Robbie Baker and Brent McIvor.

LOCAL HIGH SCHOOL ELECTION RESULT

On Friday, September 23, Thompson High School held the elections for its first student council. The students, comprising grade seven to twelve, assembled in the school auditorium for the great event.

"O Canada" was played by David Klassen and Principal S. V. Brickman as chairman introduced the offices of each group.

BLUE PARTY: President, Ken Delaney supported by Rick Sandelli and introduced by Jerry Stunick. For first vice-president Bob Thornborough supported by Dave Cameron and introduced by Rusty Faickney. For second vice-president Dave Armstrong supported by Terry White and introduced by Cheryl Freed. For secretary Sybille Muehrer supported by Martha Harley and introduced by Jim King. For treasurer Mickey Regimbald supported by Siegi Muehrer and introduced by Rene Blais.

GOLD PARTY: President Phil Gies supported by Dave Klassen and introduced by Jack McNamara. For first vice-president Darwyn Samuels supported by Wayne LeBlanc. For Second Vice-president Dave Chaddock supported by Donna Werbiski and introduced by Jean Harvey. For secretary Eileen Mick supported by Dick McIvor and introduced by Donna Werbiski. For treasurer John Nesbitt supported by Carol Wakefield and introduced by Ricky Hess.

Following the speeches of the second vice president, a lovely selection was played on the piano by Marcella Waschuck, entitled "Ebb Tide".

After every candidate had spoken, David Klassen played "God Save the Queen and the classes then returned to their rooms, where they voted.

The results were: President, Ken Delaney; first vice-president, Bob Thornborough; second vice-president Dave Armstrong; secretary, Eileen Mick; treasurer John Nesbitt.

Visitors to the Thompson presbytery of the United Church included Rev. George Lalonde of Creighton; Rev. Ken Campbell, superintendent of Home Missions Conference of Manitoba; Rev. Dick Kendall of Snow Lake; Russ Young, layman of Snow Lake.

his photo are shown the 1960-61 executive members of the Thompson High School Student Council. Left to right: John Nesbitt treasurer, David Armstrong second vice president, Eileen Mick secretary, Bob Thornborough first vice president, Ken Delaney president.

Thompson Presbytery

This week St. John's United Church at Thompson played host to the annual fall meeting of the Hudson Bay Presbytery of the United Church. Fourteen delegates, clergy and lay people from Flin Flon, The Pas, Lynn Lake and Snow Lake, and two visiting ministers from Winnipeg took part in the meetings. The local congregation was represented by the minister, Rev. Lawrence E. Fetter, and R. Wheelan. The presbytery meetings were held in the court room of the municipal building, and the local United Church people wish to express appreciation for the use of these facilities.

The following report was submitted by Rev. Mr. Fetter.

Here are some of the items discussed by Presbytery which might be of interest to Thompsonites. Some deal with local matters over which Presbytery has oversight, and others show the broad concern which the church has for the life and work of its members everywhere!

R. G. Freed, chairman of our local Lot Location Committee reported the findings of this committee, and presbytery approved the committee's choice of location for the future church buildings. The site is on the corner of Cree Road and Deerwood, across Deerwood from the Roman Catholic Church site. With presbytery's approval of the site, the planning of the initial unit in the Church structure begins. Committees are being set up locally to draw up

(Continued on Page 2)
